QUIET KITCHEN EXHAUST

EXHAUSTO

Kitchen exhaust as quiet as a whisper.

The fan housing is insulated on all sides with 1.25" fiber mat. A service door provides easy access to the blower wheel and duct.

BESF Box Ventilator

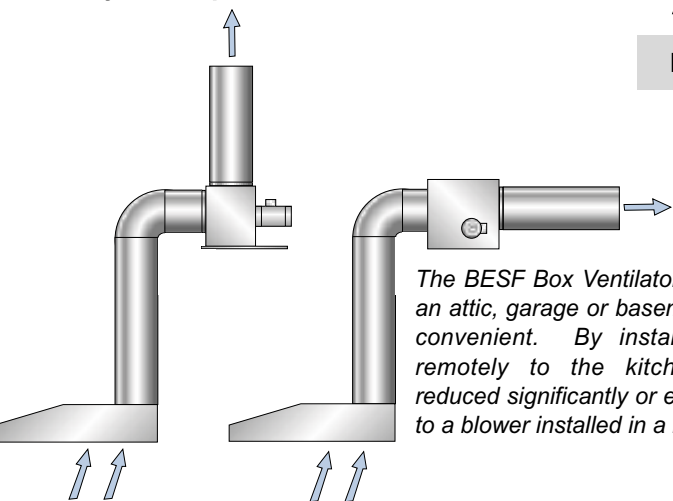

EXHAUSTO BESF Box Ventilator is a high performance ventilator designed for whisper quiet operation. Not only is it quiet when performing, it is also invisible.

It will efficiently vent any type of kitchen hood whether it's a wall-mounted or an island hood. It is also powerful enough to handle a downdraft unit efficiently.

The heavy-duty BESF is designed to perform year after year — just like the commercial ventilators EXHAUSTO has been world-famous for since 1956.

FEATURES

- Variable speed
- Whisper quiet operation due to the insulated housing design
- Adapts to any hood or downdraft design
- Easy to install
- Insulated to prevent condensation and noise
- Maintenance free
- Can be controlled by virtually any hood speed control

The BESF Box Ventilator can be installed in an attic, garage or basement — or wherever convenient. By installing the ventilator remotely to the kitchenhood, noise is reduced significantly or eliminated compared to a blower installed in a hood.

PERFORMANCE

	BESF 146	BESF 160	BESF 180
Max. CFM rating	500 CFM	750 CFM	1,000 CFM
Min. CFM rating	100 CFM	125 CFM	200 CFM
Ducting *)	7"	8"	8"
Amperage	1.2A	2.9A	5.9A
Energy Consumption	0.08kW	0.16kW	0.35kW

*) Adapters are available for other duct sizes. However, ducts should be no less than 6".

Larger ventilators are available for applications with higher CFM requirements.

A minimum exhaust rate of 40 CFM per linear foot of hood width is recommended by the Home Ventilating Institute.

2-Year factory warranty.
